**a** **Input interventions and profile agreement**

706,642 windows · 222 tasks · 150 RBPs (separate cohort)

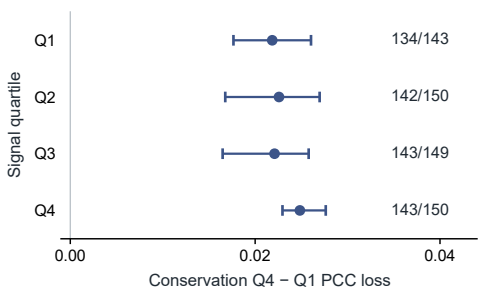

**b** **Signed circular displacement**

Equal-RBP mean and 95% bootstrap CI

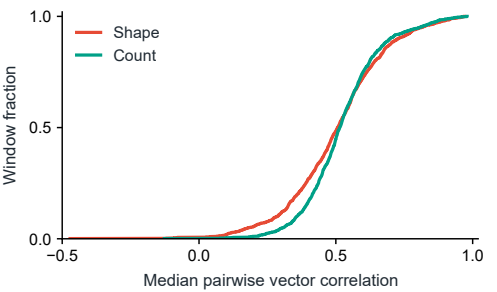

**c** **Conservation contrast within signal strata**

Positive / available RBPs

**d** **Shuffle agreement across all windows**

1,120 windows (factorial cohort)

**Secondary conditional-response magnitudes**

Count RMS: 0.01126 (95% CI 0.00994–0.01208)

Full-profile JSD contrast RMS: 0.000734 (95% CI 0.000661–0.000990)

**Negative vector correlations retained**

Shape: 7 / 1,120; count: 2 / 1,120

Shared aligned term; descriptive agreement only
