Pastel sectors: six cuts of the retained tree for visual orientation; not biological classes.

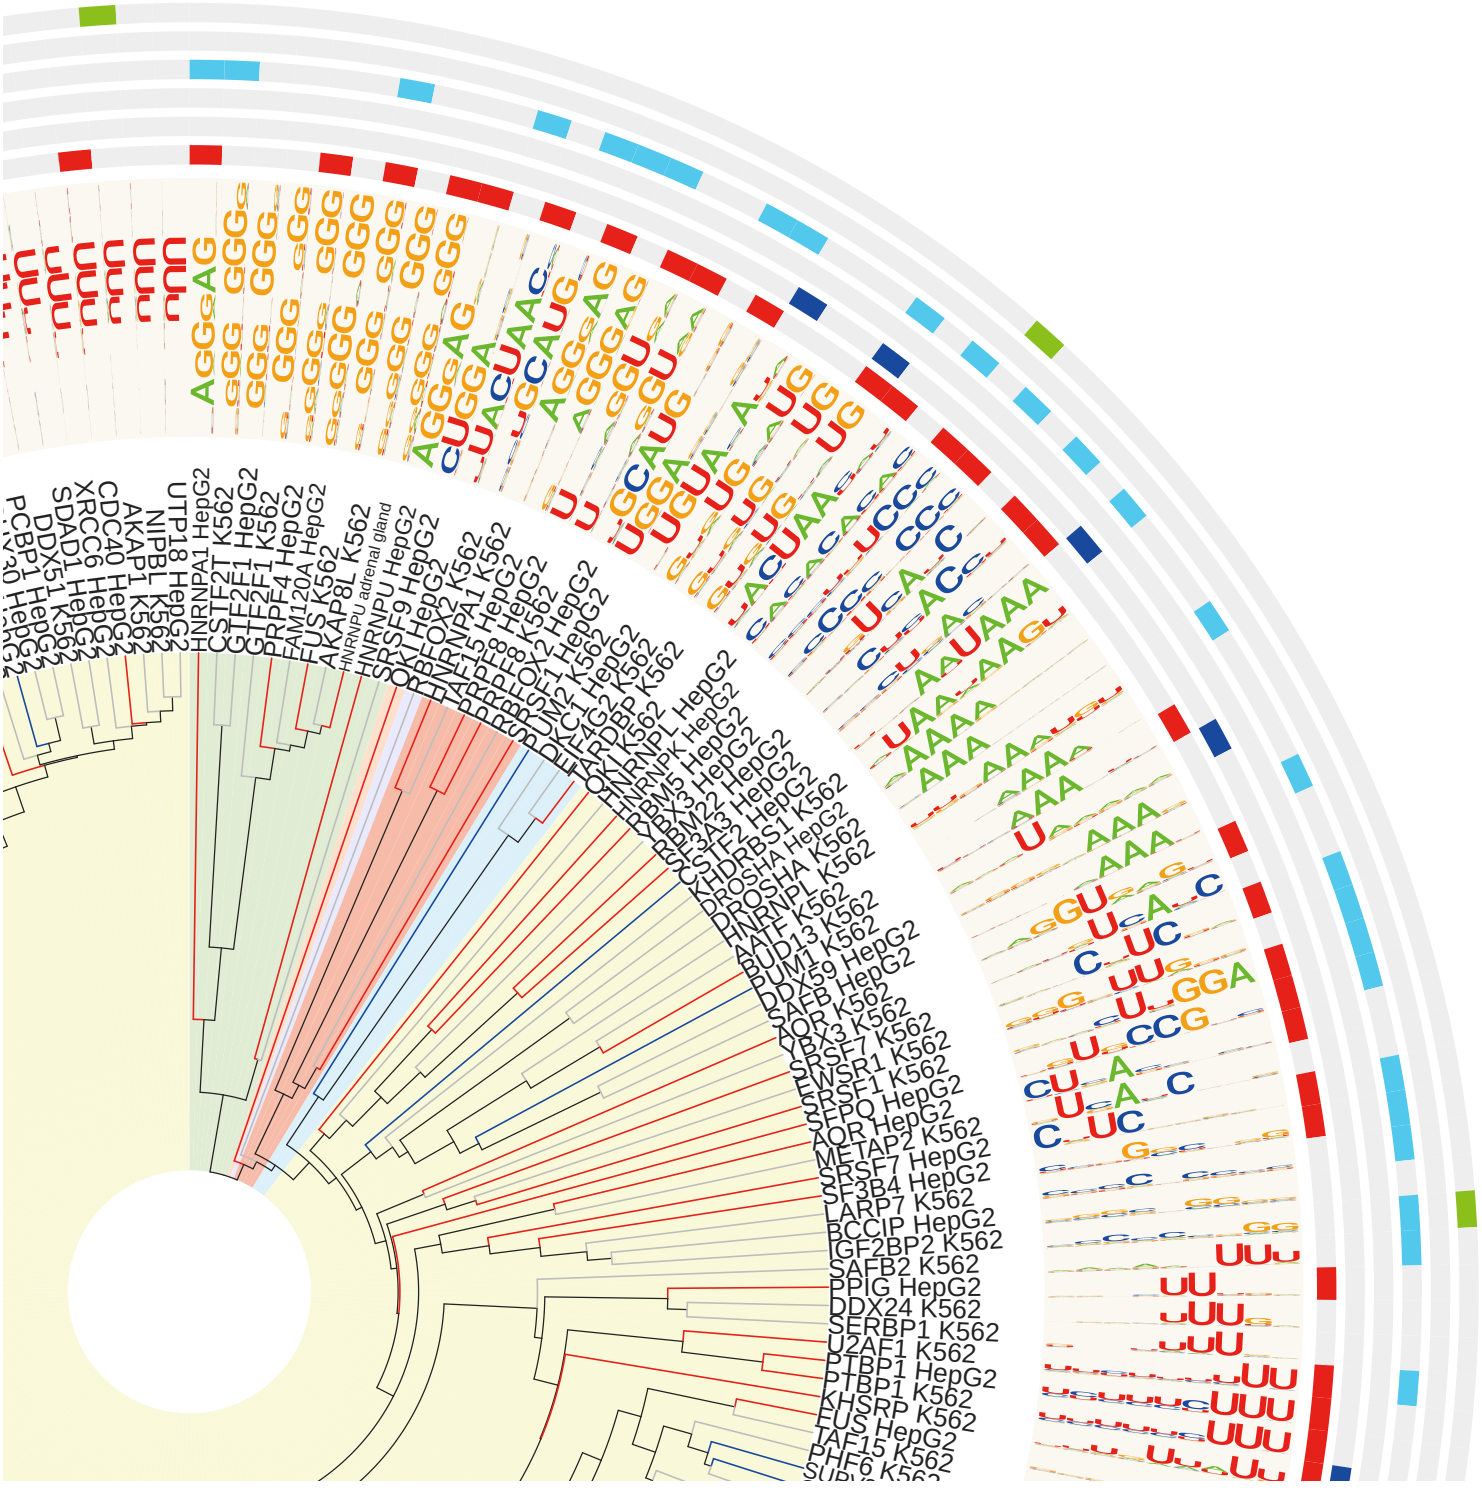

Figure S21 | quadrant 1

Overlapping views retain every full name, motif and annotation in at least one quadrant.

Tree topology, 219-task population and original annotation values are unchanged.

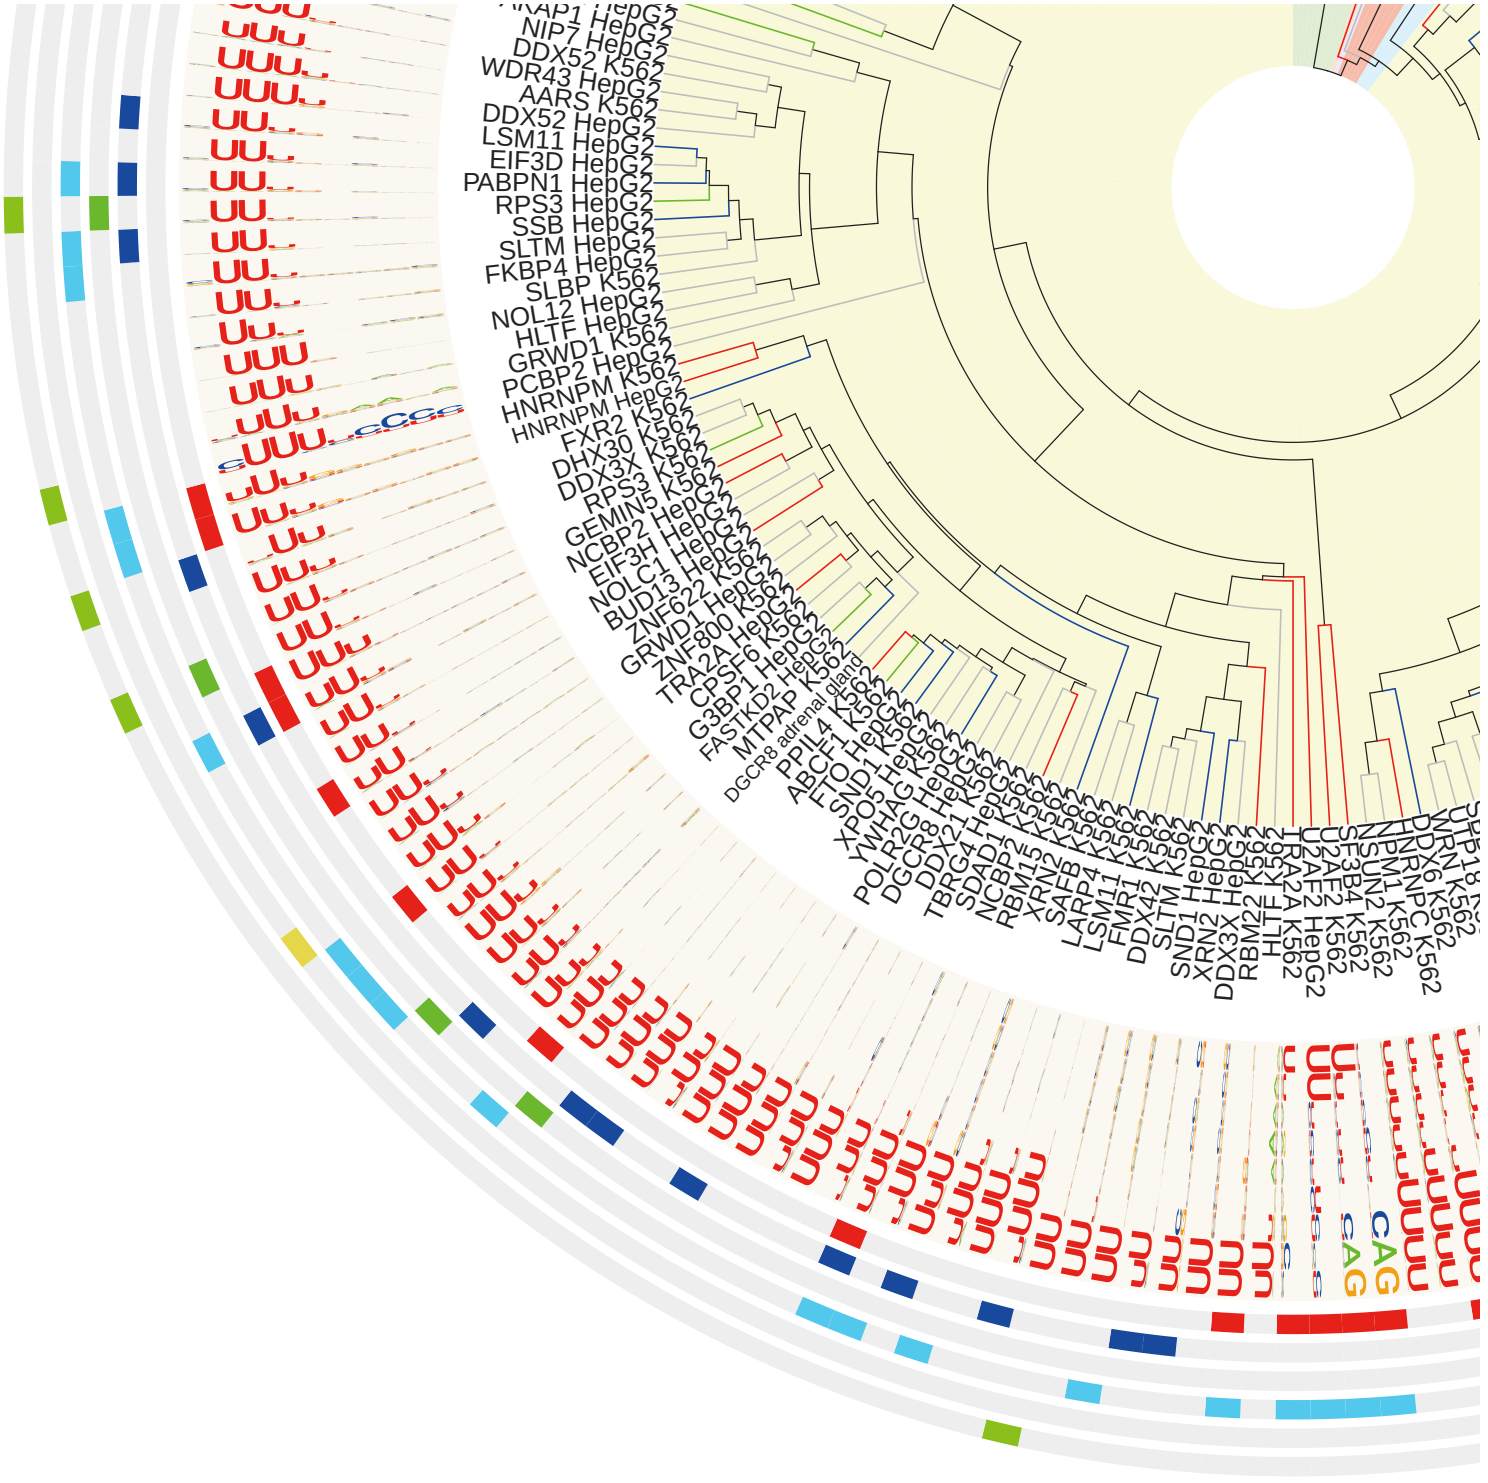

Figure S21 | quadrant 2

Overlapping views retain every full name, motif and annotation in at least one quadrant.

Tree topology, 219-task population and original annotation values are unchanged.

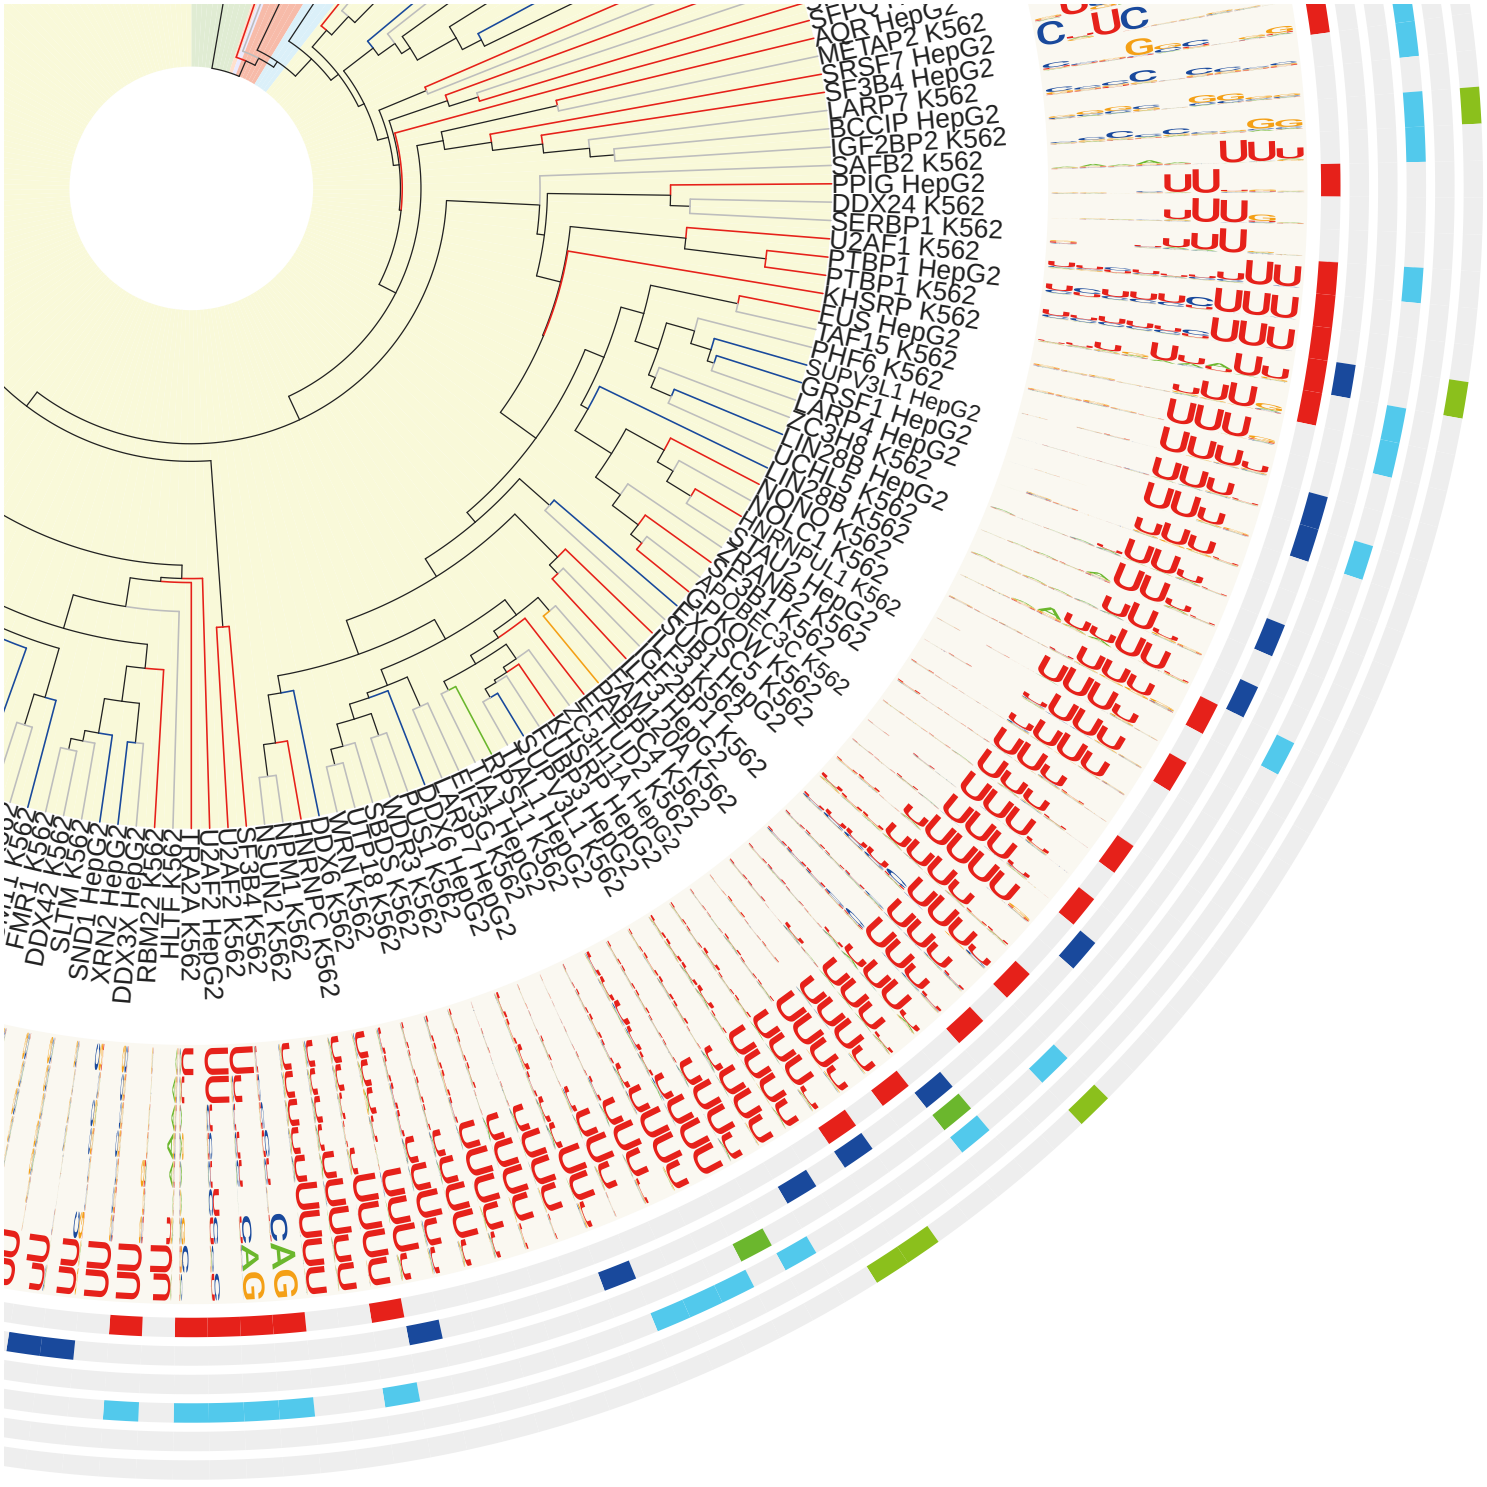

Figure S21 | quadrant 3

Overlapping views retain every full name, motif and annotation in at least one quadrant.

Tree topology, 219-task population and original annotation values are unchanged.

Figure S21 | quadrant 4

Overlapping views retain every full name, motif and annotation in at least one quadrant.

Tree topology, 219-task population and original annotation values are unchanged.
